NEWS FROM JAPAN. The New York Herald gives an interesting letter from Townsend Harris, in Japan, con-

taining political and other news. The Japanese had applied for an American steamer to forward their Envoy to this country. The readiness with with the leading European Powers accepted Mr. Harris' treaty had added greatly to his influence with the Japanese. "For I had told them, long before our trenty was completed, that any treaty that was satistactory to me would be accepted by all the nations that would wish to have treaties with them, and this literal accomplishment of my assertions has greatly pleased them.

"A ministerial crisis occurred at Yedo on the 3d of August. Hetta, Prince of Bitteu, Chief of the Great Council of State and Minister for Foreign Affairs; and Ninto, Prince of Kee, Member of the Council, were dismissed from office, and their places were filled by Ota, Prince of Bingo, and Monahay, Prince of Simo-o-sa.

"Both of the last named persons belong to the "Old Fogey' party of Japan. This unexpected occurrence is said to have been brought about by the signing of the treaty with me on the 29th of July. The opponents of the treaty alleged that the two Ministers had been frightened by me; that neither the English nor French were coming to Japan, and that from the cowardice they had shown they had proved themselves to be unfit for the places they held. The clamor was so loud and so well sustained that the two Princes were dismissed, as already stated.

The present Ministry embraces friends of the Americans. "On the 17th of September the Japanese

officially announced the death of the Tycoon, stating that he expired on the 12th of that I was informed of his death on the 29th of August, and in fact the actual date of his demise was on the 16th of August, but it was concealed by the authorities until they could complete their negotiations with the English and Russians, which would have been suspended had the death been an-

"The Tycoon was subject to epileptic fits, and it is very probable that the great excitement in Yedo that followed the signing of the American treaty may have brought on a fatal attack of his malady. The successor to the throne is an adopted son of his late Majesty. He is said to be a bright youth of some fifteen years of age. He will be allowed to marry when he reaches the age of eighteen. Of course, the youth of the new ruler remove the necessity of any speculation as to what his views may be as relates to the foreign affairs of this country.

ly after our ships, the Powhatan and Mississippi, left that place. The disease spread rapidly over the islands of Kinsu and Sikok, and crossed over to Nipon (our island.) It made great havoc in the cities of Simonoski, Osaca, Kioto, Yedo, &c., and all the villages and bamlets. The authorities inform me that in Yedo alone one hundred and fifty thousand persons died during the first month of the malady. I am happy to say that it has nearly ceased. My situation here was a trying one; the malady swep off over one hundred persons out of our little hamlet in less than twenty days. No medical aid on which I could rely was to be obtained. Happily all my household escaped. The disease, in part, assumed a novel type. The subjects were attacked with a burning fever in the quently died the second hour after the at-

this country This is, perhaps a fortunate Nail Brushes, and Steel and India Rubber Hair circumstance, as had its first appearance here been simultaneous with the opening of the country to foreigners, the consequences might have been unpleasant. As it is, some of the common people at Nagasaki said the foreigners had brought the disease, had poisoned the wells, &c. Fortunately nothing seri- AGRICULTURAL IMPLEMENTS, SEEDS, &c. ous grew out of the feeling, although it is said that the prests were very busy in conveying such ideas to the people.

The only effect at Simoda was to produce a decided "revival." Never were the temples and mies so crowded; the prests rejoiced in a of all sorts; fish nets were hung over the doors to entangle the Bi-o-ki, should it attempt to enter the house; sickles, knives, and and arrows fitted to them, threatened the demon from each penthouse: guns were fired during the night to frighten him, and gongs beaten loud enough and long enough to stun him if he had ears. Enormous rosaries, some twelve feet in circumference, and with beads an inch in diameter, made their appearance, and a dozen devotees would rush to each one, passing it rapidly through their hands, shouting Amida, Amida, Amida, from the bottom of his lungs. The altars in the tem-ples and mies looked like barber's shops, from the great number of "topknots" which the Japanese had cut off and hung up as offerings. Over every pathway charms were suspended to barricade the approaches to the houses and hamlets. You may imagine what a spectacle all this was to your friend. But enough for the present. I am well, thanks to Providence, and now my chief anxiety is to hear

SOMBRERO GUANO. N calling the attention of the public to this val-uable and recently discovered deposit of this fertilizing article, we will merely state, that like all other phosphatic GUANOS, its most valuable constituent is phosphoric acid, or bone phosphate of lime; and that its mercantile value, as compared with other GUANOS of its kind, may be easily de termined by the amount of phosphoric acid or bone phosphate of lime it contains. In order, therefore, to give the public a thorough knowledge of what SOMBRERO GUANO does contain, we beg to refer to the following list of eminent chemists in different parts of the world, who have analyzed different cargoes, from average samples taken by themselves from the cargoes just as they arrive from the island, without drying or selection of specimens for analyzation. Each analysis will be exhibited, if required, under the original signature
